DEVOPS ENGINEER

PROFESSIONAL SUMMARY

DevOps Engineer with 4+ years of total technical experience and 3+ years of hands-on DevOps experience, skilled in AWS, Docker, Kubernetes, CI/CD pipelines, and monitoring. Experienced in infrastructure automation, cloud-native deployments, Jenkins and GitHub Actions, Linux administration, and Python scripting, delivering scalable, secure, and highly available systems while supporting continuous delivery and operational reliability.

PROFESSIONAL EXPERIENCE

Software Engineer (DevOps) - IBM

Project: MFT (Managed File Transfer) | Oct 2021 – Present | Bengaluru

- Worked on **Managed File Transfer (MFT)** solutions to enable **secure, reliable, and automated file transfers** across enterprise systems.
 - Provided and supported **multi-stage environments** including **Development, QA, UAT, and Production** for MFT applications.
 - Demonstrated expertise in **containerization using Docker and Kubernetes** across **cloud (AWS) and on-premises environments**.
 - Automated deployments and operational tasks using **CI/CD pipelines, Linux shell scripting, and Python** to improve efficiency and reliability.
 - Monitored MFT services using **monitoring and alerting tools**, proactively identifying and resolving transfer failures.
 - Performed **production support and incident management**, including **log analysis and root cause analysis (RCA)**.
 - Participated in **on-call rotations** to ensure **24/7 availability** and rapid incident response.
 - Worked closely with **security teams** to ensure compliance with **encryption standards and secure file transfer policies**.
 - Supported **PV cycles and release validation**, ensuring successful deployment of **patch, hotfix, and master builds** through CI/CD pipelines.
 - Worked as a **Release Engineer**, managing **build, release, and deployment processes** across multiple environments.
 - Collaborated with **development and QA teams** to support testing, verify fixes, prevent regression, and ensure release readiness.
 - Created and maintained **SOPs, troubleshooting guides, and deployment documentation**.
 - Performed **environment upgrades, configuration changes, and maintenance activities** for MFT platforms with minimal downtime.
 - Integrated **SAST/DAST security scans** into **CI/CD pipelines**, enabling early detection of security issues.
-

Technical Trainee — Software AG | Feb 2020 – Oct 2021

- Worked on **cloud automation scripting**, focusing on automating cloud operations and workflows.

PROJECTS

Cloud Streams - Software AG

- Designed and implemented **UI automation frameworks using Python (Robot Framework)** for functional testing.
 - Developed **Java backend code** for **proof-of-concept (POC) applications** to validate cloud-based solutions
 - Supported **cloud automation initiatives**, writing scripts to improve efficiency and reduce manual effort.
 - Collaborated with senior engineers on **cloud and automation projects**, gaining hands-on experience with cloud platforms and DevOps fundamentals.
